DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-12 is allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include a lens module for a thin scanning device, said lens module to be disposed on an optical path from an original to an image sensor, the optical path including a chief ray at zero-field and full field comprising a first lens, second lens, stop, third lens, fourth lens, fifth lens where a ratio of the diameter of the said stop to that of said fifth lens being less than 0.5 as claimed.

Regarding claim 5, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include a scanning device comprising a transparent window, light source, image sensor, lens module comprising a comprising a first lens, second lens, stop, third lens, fourth lens, fifth lens where a ratio of the diameter of the said stop to that of said fifth lens being less than 0.5 as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2873

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujibayashi et al (US 6,307,661) discloses a color image reading apparatus; Lien (US 2004/0125418) discloses an optical path device; and Wakamiya (US 4,394,073) discloses a compact wide-angle lens.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia M Harrington whose telephone number is 571 272 2330. The examiner can normally be reached on Monday - Thursday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Epps can be reached on 571 272 2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
